

FARHEEN ALI

Full Stack Developer | AI/ML & Blockchain Engineer

Results-driven Full Stack Software Engineer with 5+ years of experience in Java backend development using Spring Boot, Hibernate, and MySQL, along with strong full-stack expertise across Node.js, React, Angular, and Python. Proven track record of building AI/ML models, Solana blockchain solutions, and cloud-native microservices on AWS, Azure, Kubernetes, and Azure AD. Delivered end-to-end Fintech, E-commerce, and cryptocurrency platforms with strong focus on performance, security, SEO, and CI/CD deployment across web, Android, and iOS.

EDUCATION

Major in Artificial Intelligence

IIT Ropar
08/24 - 02/26

Full Stack Web Development (Full-time)

Masai School, Bengaluru
03/22 - 01/23

B.Tech (Computer Science)

SITE (AKTU), Hapur
06/15 - 07/17

TECHNICAL SKILLS

Java	Spring Boot
Node.js	React.js
Python	Angular
JavaScript	TypeScript
Golang	HTML/CSS
SQL	Hibernate
REST API	Microservices
AWS	AWS Lambda
Azure	Azure AD
Kubernetes	Docker
CI/CD	Jenkins
AI / ML	Claude AI
Solana	Blockchain
Web3	Android SDK
Kafka	SQS
SEO	Agile / Scrum

SOFT SKILLS

Problem-solving
Teamwork
Communication
Time management

CERTIFICATIONS

Major in AI - IIT Ropar (2024-2026)
Full Stack Web Dev - Masai School

PROFESSIONAL EXPERIENCE

Senior Software Engineer

05/24 - Present

Yebelo Technology & CLR · New Delhi, Delhi

- Developed and maintained full-stack applications using Java, Spring Boot, Node.js, Python, React, and Angular
- Designed, trained, and deployed AI/ML models for predictive analytics and intelligent automation
- Engineered Solana blockchain and Web3 cryptocurrency projects with secure, scalable architecture
- Integrated Claude AI and OpenAI APIs for intelligent agents, content generation, and workflow automation
- Deployed cloud-native solutions on AWS (Lambda, EC2, S3), Azure, and Kubernetes with CI/CD pipelines
- Led SEO strategy and on-page optimization, improving organic traffic and keyword rankings
- Delivered production releases: Android APK, iOS apps (Play Store / App Store), and web deployments

Software Engineer Intern

02/23 - 04/24

Omniful · Remote

- Integrated e-commerce platforms: Shopify, WooCommerce, Amazon, Zid, Salla, and ToYou
- Implemented Apache Kafka and AWS SQS for event-driven inter-service communication using Golang

Software Developer (Java Backend)

02/20 - 01/23

RFS · New Delhi, Delhi

- Developed Java backend monolithic applications for Fintech clients, including a CA (Chartered Accountant) accounting firm
- Designed secure financial data modules using Java, Spring, Hibernate, and MySQL for tax, audit, and compliance workflows
- Built and integrated Digital Signature functionality for regulatory and e-filing compliance
- Provided technical support, system integration, and performance optimization for enterprise clients

Admin and Technical Teacher

02/17 - 01/20

IOC · New Delhi, Delhi

- Taught Computer Science (Class 11-12), ITSM to IPCC (CA) batch, BSc Mathematics, and Aptitude Math

Mobile Service Engineer

02/16 - 01/17

Samsung · New Delhi, Delhi

- Diagnosed and repaired L4 section Samsung mobile devices, ensuring high first-time fix rates

PROJECTS

AI-Powered Market Analysis for Solana & Pump.fun Coins · [Source]

Tech Stack: Python, Machine Learning, TensorFlow, Solana API, AWS, Node.js

Features: Real-time price prediction, trading volume analysis, multi-exchange data aggregation, automated alerts

- Developed a robust AI model for real-time market analysis of Solana and Pump.fun cryptocurrencies
- Applied machine learning to predict price trends, analyze trading volumes, and identify profitable opportunities
- Integrated data from multiple crypto exchanges and news sources to enhance prediction accuracy

Multi-Channel E-commerce Integration Platform

Tech Stack: Golang, Apache Kafka, AWS SQS, REST API, Microservices

Features: Multi-marketplace sync, event-driven order/inventory flow, unified catalog APIs

- Built and integrated sales channel services for Shopify, WooCommerce, Amazon, Zid, Salla, and ToYou
- Implemented event-driven microservices using Apache Kafka and AWS SQS for real-time order and inventory sync
- Designed scalable REST APIs to unify order, catalog, and fulfillment workflows across multiple marketplaces
